

# Fertility medication management through Progyny Rx

Progyny Rx is an integrated pharmacy solution for specialty fertility medications, delivering a supportive member experience and simplified administration for clients in all 50 states. Our significant buying power and proprietary waste management addresses the nuances of fertility medication, resulting in 10% savings over and above best unit pricing - while supporting members and providers in optimal treatment outcomes.

## Streamlining a fertility-specific Rx experience

Simultaneous medical & Rx authorization

Same-day or overnight shipping with PCA follow-up

UnPackIt™ call and 24/7 support for medications

Elimination of overprescribing and waste

Progyny developed custom Rx experience with URAC-accredited fertility specialty partners

## Unique to Progyny's fertility formulary management:

<b>Treatment-specific dispensing</b>	Medication is dispensed throughout the member's treatment rather than in bulk, accommodating for patient dosing requirements that can vary as much as 500% day-to-day. Progyny dispenses an average of 2.6x per cycle and maintains 100% on-time delivery—preventing missed cycles or the need to re-start treatment.
<b>Client savings at point of sale</b>	Rebates and discounts negotiated by volume are applied at the point of sale, lowering overall client cost throughout the year (rather than in aggregate).
<b>Lower member cost share</b>	Progyny-negotiated prices and waste management protocols mean lowered member cost share.
<b>Supportive member &amp; client experience</b>	Patients receive 24/7 support to administer medication effectively, optimizing treatment effectiveness and reducing the need for additional treatment. Clients gain transparency into patient-level dispensing and outcomes, with no additional fees for administration.

93% of Progyny clients utilize Progyny Rx
