

DIABETES MANAGEMENT

TAKE CHARGE OF DIABETES

Control diabetes, so it doesn't control you

One in 10 Americans has diabetes,¹ but for people living with the disease, it can feel like you're all alone. Now there's a program that gives you the support you need.

The Diabetes Management program by Omada is a personalized digital care program that gives you the support and tools you need to manage your diabetes and reach your health goals. You'll have access to a Certified Diabetes Care and Education Specialist (CDCES) to answer your questions and offer guidance between doctor visits. Along with remote blood glucose monitoring, you'll have someone trained in diabetes management interpreting your data and giving you information you can act on. In addition, your CDCES will:

- Offer support toward making small, achievable lifestyle changes to lose weight and keep it off
- Help determine the right timing for primary care provider (PCP) visits to address your treatment plan
- Alert you to trends in your levels and alert you immediately of dangerous values. You'll also receive a follow-up to help identify the cause and create a plan to avoid future occurrences.
- Provide recommendations for screenings and preventive services to help avoid complications from related conditions
- Address issues or concerns you have with your medications, as well as ensure regular PCP visits for adjustments

You'll also have access to an online peer group for ongoing encouragement and weekly lessons to help you understand diabetes and how to manage it. Topics cover disease self-management education (DSME) and include benefits of blood glucose monitoring, preventing diabetes complications, managing sick days and more.

The program is tailored to your individual care plan and health goals. There's no additional cost for qualified individuals and it only takes about 10 minutes to fill out the application. Look for an email invitation to join within two days after submitting your application.

Diabetes management with Omada can help you:

- Achieve your target blood glucose levels
- Stay on top of critical screenings
- Overcome challenges with medications
- Understand blood glucose readings and trends
- Prevent complications
- Lose weight and improve your overall health
